

COOKIE POLICY

What are Cookies

A cookie is a small piece of text sent to your browser by a website that you visit. It helps the website to remember information about your visit, like your preferred settings. This can make your next visit easier and the site more useful to you. Cookies play an important role. Without them, using the web would be a much more frustrating experience.

How we use Cookies

This cookie policy covers the cookies used on fuelmech.org and any other Computational Chemistry Consortium website. Some cookies on the website are essential to enable you to move around the website. Services such as accessing secure areas of the website and staying logged in cannot be provided without these cookies. Other cookies on this website collect anonymous information about how visitors use our website (for example, which pages visitors go to most often and if they encounter error messages on web pages). It is also possible that our partners will track you for ad serving behavior when you play a video on the website. For this reason we ask for your consent before you view one of our videos.

The cookies that the website and our partners use are detailed below.

Performance Cookies

ANALYTICS.CONVERGECFD.NET

Cookies that are prefixed by:

_pk_ref
_pk_cvar
_pk_id
_pk_ses

These cookies collect information about how visitors use a website (for instance, which pages visitors go to most often and if they get error messages from web pages). These cookies don't collect information that identifies a visitor. All information that these cookies collect is aggregated and therefore anonymous. It is used only to improve how a website works. By using these website you agree that we can place these types of cookies on your device.

Advertising Cookies

YOUTUBE

Cookies that are prefixed by: yt

We use YouTube videos in Privacy Enhanced Mode, which embeds YouTube videos without using cookies that track viewing behavior. This means viewing inbox isn't collected to personalize the viewing experience. Instead, video recommendations are contextual and related to the currently played video. Videos playing in a Privacy Enhanced Mode embedded player won't influence the viewer's browsing experience on YouTube.

The Privacy Enhanced Mode only relates to the tracking of viewer behavior, not ads-serving behavior. Unfortunately, there is no way for us to show YouTube videos without tracking ads-serving behavior. However, you may be able to control this yourself by turning off ad personalization here: <https://adssettings.google.com>.

Strictly Necessary Cookies

CLOUDFLARE

Cookies that are prefixed by: __cf

These cookies are essential in order to enable you to move around the website and use its features; for example, the __cfduid cookie is used to identify individual clients behind a shared IP address and apply security settings on a per-client basis.

FUELMECH.ORG

Cookies include:

XSRF-TOKEN
fuelmech_session

These cookies are essential in order to enable you to move around the website and use its features, such as accessing secure areas of the website. For example, the XSRF-TOKEN prevents cross-site request forgery.

Functionality Cookies

FUELMECH.ORG

Cookies that are prefixed by:

cookieconsent_
cs_
remember_

These cookies allow the website to remember choices you make (such as your user name). For instance, to remember if you have already consented to some tracking. The information these cookies collect may be anonymised and they cannot track your browsing activity on other website. By using this website you agree that we can place these types of cookies on your device.
